As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.

A9:42

Last summer my husband became deathly ill with streptococcus aureo. Nobody knows how he got it, and the doctors had a terrible time finding antibiotics that worked. Every organ in his body was involved. He was in the hospital for 2 months it's a miracle that he pulled through.
